TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY
INDEX, VOLUMES 101–110
1962–1964

	Vol.	Pages
ABLOW, C. M. and BRENNER, J. L. Roots and canonical forms for circulant matrices	107_2	360–376
ACCOLA, R. D. M. On semi-parabolic Riemann surfaces	108_3	437–448
ADLER, A. W. On spherical characteristic cohomology	108_2	240–250
ADLER, R. L. Invariant and reducing subalgebras of measure preserving transformation	110_2	350–360
ALLAUD, GUY and FADELL, EDWARD. A fiber homotopy extension theorem	104_2	239–251
ALLING, N. L. On the existenc of real-closed fields that are η_α-sets of power $\aleph_\alpha$	103_3	341–352
——— An application of valuation theory to rings of continuous real and complex-valued functions	109_3	492–508
ALPERIN, J. L. On a special class of regular p-groups	106_1	77–99
ANDERSON, F. W. Approximations in systems of real-valued continuous functions	103_2	249–271
ANDREWS, G. E. A lower bound for the volume of strictly convex bodies with many boundary lattice points	106_2	270–279
ARENS, RICHARD. The problem of locally-A functions in a commutative Banach algebra A	104_1	24–36
ARKOWITZ, M. and CURJEL, C. R. The Hurewicz homomorphism and finite homotopy invariants	110_3	538–551
AUSLANDER, L. and HAHN, F. Real functions coming from flows on compact spaces and concepts of almost periodicity	106_3	415–426
AUSLANDER, MAURICE and BUCHSBAUM, D. A. Invariant factors and two criteria for projectivity of modules	104_3	516–522
AUSTIN, C. W. Duality theorems for some commutative semigroups	109_2	245–256
AX, JAMES. The intersection of norm groups	105_3	462–474
AZPEITIA, A. G. On the proximate linear orders of entire Dirichlet series	104_3	495–501
BABBITT, A. E., JR. Finitely generated pathological extensions of difference fields	102_1	63–81
BARNDORFF-NIELSEN, O. and BAXTER, GLEN. Combinatorial lemmas in higher dimensions	108_2	313–325
BASS, HYMAN. Injective dimension in Noetherian rings	102_1	18–29
——— Torsion free and projective modules	102_2	319–327
BAUM, L. E., KATZ, MELVIN and READ, R. R. Exponential convergence rates for the law of large numbers	102_2	187–199

	Vol.	Pages
BAUMSLAG, GILBERT. On the residual finiteness of generalised free products of nilpotent groups	106_2	193–209
——— Some subgroup theorems for free $\mathfrak{v}$-groups	108_3	516–525
——— On the residual nilpotence of some varietal products	109_2	357–365
BAXTER, GLEN and BARNDORFF-NIELSEN, O. Combinatorial lemmas in higher dimensions	108_2	313–325
BEESACK, P. R. On an integral inequality of Z. Opial	104_3	470–475
BERKSON, A. J. On Amitsur's complex and restricted Lie algebras	109_3	430–443
BERRI, M. P. Minimal topological spaces	108_1	97–105
BING, R. H. A surface is tame if its complement is 1-ULC	101_2	294–305
BIRKHOFF, GARRETT. Uniformly semi-primitive multiplicative processes	104_1	37–51
BISHOP, ERRETT. Analyticity in certain Banach algebras	102_3	507–545
BOEHME, T. K. Operational calculus and the finite part of divergent integrals	106_2	346–368
BOHN, ELWOOD and JACKSON, L. K. The Liouville theorem for a quasi-linear elliptic partial differential equation	104_3	392–397
DE BRANGES, LOUIS. Some Hilbert spaces of entire functions. IV	105_1	43–83
——— Some Hilbert spaces of analytic functions. I	106_3	445–468
BRENNER, J. L. and ABLOW, C. M. Roots and canonical forms for circulant matrices	107_2	360–376
BROWDER, WILLIAM. On differential Hopf algebras	107_1	153–176
——— Higher torsion in H-spaces	108_2	353–375
BROWN, E. H., JR. Nonexistence of low dimension relations between Stiefel Whitney classes	104_2	374–382
BUCHSBAUM, D. A. and AUSLANDER, MAURICE. Invariant factors and two criteria for projectivity of modules	104_3	516–522
BURKHOLDER, D. L. Semi-Gaussian subspaces	104_1	123–131
BUSBRIDGE, I. W. On solutions of Chandrasekhar's integral equation	105_1	112–117
CANTOR, D. G. On sets of algebraic integers whose remaining conjugates lie in the unit circle	105_3	391–406
CANTRELL, J. C. Separation of the n-sphere by an $(n-1)$-sphere	108_2	185–194
CANTRELL, J. C. and EDWARDS, C. H., JR. Almost locally polyhedral curves in euclidean n-space	107_3	451–457
CARROLL, F. W. Difference properties for continuity and Riemann integrability on locally compact groups	102_2	284–292
CARROLL, ROBERT and NEUWIRTH, JEROME. Some uniqueness theorems for differential equations with operator coefficients	110_3	459–472

	Vol.	Pages
CESARI, LAMBERTO. Quasi additive set functions and the concept of integral over a variety	102_1	94–113
—— Extension problem for quasi additive set functions and Radon-Nikodym derivatives	102_1	114–146
CHAMBERLAIN, E. W. Families of principal solutions of ordinary differential equations	107_2	261–272
CHANG, C. C. Ordinal factorization of finite relations	101_2	259–293
CHIHARA, T. S. Chain sequences and orthogonal polynomials	104_1	1–16
CHURCH, P. T. Differentiable open maps on manifolds	109_1	87–100
—— Boundary images of meromorphic functions	110_1	52–78
—— On points of Jacobian rank k	110_3	413–423
CIESIELSKI, Z. and TAYLOR, S. J. First passage times and sojourn times for Brownian motion in space and the exact Hausdorff measure of the sample path	103_3	434–450
CIVIN, PAUL. Weak structural synthesis for certain Banach algebras	104_3	420–424
CLAY, J. P. Proximity relations in transformation groups	108_1	88–96
CLIFTON, Y. H. and SMITH, J. W. Topological objects and sheaves	105_3	436–452
COFFMAN, C. V. Asymptotic behavior of solutions of ordinary difference equations	110_1	22–51
COHEN, D. E. and LYNDON, R. C. Free bases for normal subgroups of free groups	108_3	526–537
COHEN, ECKFORD. Errata to "A class of arithmetical functions in several variables"	102_3	545
COHN, HARVEY and PALL, GORDON. Sums of four squares in a quadratic ring	105_3	536–556
COHN, P. M. Noncommutative unique factorization domains	109_2	313–331
—— Rings with a weak algorithm	109_2	332–356
COLEMAN, D. B. Finite groups with isomorphic group algebras	105_1	1–8
COLLINS, H. S. and KOCH, R. J. Regular $\mathscr{D}$-classes in measure semigroups	105_1	21–31
CONNER, P. E. and FLOYD, E. E. Fixed point free involutions and equivariant maps. II	105_2	222–228
CONRAD, PAUL, HARVEY, JOHN and HOLLAND, CHARLES. The Hahn embedding theorem for abelian lattice-ordered groups	108_1	143–169
COPELAND, A. H., JR. Isology theory	107_2	197–216
CORSON, H. H. The weak topology of a Banach space	101_1	1–15
COURTER, R. C. Maximal commutative algebras of linear transformations	101_2	177–199
CUDIA, D. F. The geometry of Banach spaces. Smoothness	110_2	284–314

	Vol.	Pages
CURJEL, C. R. and ARKOWITZ, M. The Hurewicz homomorphism and finite homotopy invariants	110_3	538–551
DARST, R. B. A. decomposition for complete normed abelian groups with applications to spaces of additive set functions	103_3	549–557
DAVIS, E. D. Overrings of commutative rings. I. Noetherian overrings	104_1	52–61
——— Overrings of commutative rings. II. Integrally closed overrings	110_2	196–212
DEMAR, R. F. Existence of interpolating functions of exponential type	105_3	359–371
DICKSON, D. G. Analytic mean periodic functions	110_2	361–374
DIXMIER, J. Dual et quasi-dual d'une algèbre de Banach involutive	104_2	278–283
DUBINSKY, E. Differential equations and differential calculus in Montel spaces	110_1	1–21
EDWARDS, C. H., JR. Concentric solid tori in the 3-sphere	102_1	1–17
EDWARDS, C. H., JR. and CANTRELL, J. C. Almost locally polyhedral curves in euclidean n-space	107_3	451–457
EFFROS, E. G. A decomposition theory for representations of C^*-algebras	107_1	83–106
EHRENPREIS, LEON. Analytically uniform spaces and some applications	101_1	52–74
ELGOT, C. C. Errata to "Decision problems of finite automata design and related arithmetics"	103_3	558
ELLIOTT, JOANNE. The equation of evolution in a Banach space	103_3	470–483
ELLIOTT, E. O. and MORSE, A. P. General product measures	110_2	245–283
ELLIS, ROBERT. Point transitive transformation groups	101_3	384–395
ERNEST, J. A. A decomposition theory for unitary representations of locally compact groups	104_2	252–277
EVANS, TREVOR. The isomorphism problem for some classes of multiplicative systems	109_2	303–312
EVENS, LEONARD. The cohomology ring of a finite group	101_2	224–239
——— Errata to "The cohomology ring of a finite group"	102_3	545
——— A generalization of the transfer map in the cohomology of groups	108_1	54–65
FADELL, EDWARD and ALLAUD, GUY. A fiber homotopy extension theorem	104_2	239–251
FEFERMAN, SOLOMON. Classifications of recursive functions by means of hierarchies	104_1	101–122
FELDMAN, JACOB. On the Schrödinger and heat equations for nonnegative potentials	108_2	251–264

	Vol.	Pages
FELL, J. M. G. Weak containment and induced representations of groups. II	110_3	424–447
FELLER, E. H. and SWOKOWSKI, E. W. Errata to "Reflective N-prime rings with the ascending chain condition"	101_3	555
——— On ring extensions for completely primary noncommutative rings	105_2	251–263
FISZ, MAREK. On the orthogonality of measures induced by L-processes	106_1	185–192
FONG, PAUL. Solvable groups and modular representation theory	103_3	484–494
FORELLI, FRANK. The Marcel Riesz theorem on conjugate functions	106_3	369–390
FLOYD, E. E. and CONNER, P. E. Fixed point free involutions and equivariant maps. II	105_2	222–228
FRAENKEL, A. S. On a theorem of D. Ridout in the theory of Diophantine approximations	105_1	84–101
FRANKE, C. H. Picard–Vessiot theory of linear homogeneous difference equations	108_3	491–515
FRIEDMAN, AVNER. Function-theoretic characterization of Einstein spaces and harmonic spaces	101_2	240–258
FRIEDMAN, AVNER and LITTMAN, WALTER. Bodies for which harmonic functions satisfy the mean value property	102_1	147–166
——— Functions satisfying the mean value property	102_1	167–180
FRÖHLICH, A. Baer-invariants of algebras	109_2	221–244
FURSTENBERG, HARRY. Noncommuting random products	108_3	377–428
GARSIA, A. M. A note on the mean value property	102_1	181–186
——— Arithmetic properties of Bernoulli convolutions	102_3	409–445
GEHRING, F. W. Symmetrization of rings in space	101_3	499–519
——— Rings and quasiconformal mappings in space	103_3	353–393
GELBAUM, BERNARD. Tensor products and related questions	103_3	525–548
GETOOR, R. K. First passage times for symmetric stable processes in space	101_1	75–90
——— The asymptotic distribution of the number of zero free intervals of a stable process	106_1	127–138
GILES, W. B. On the algebra of representative functions of a Lie algebra	109_1	101–120
GINSBURG, S. and ROSE, G. F. A comparison of the work done by generalized sequential machines and Turing machines	103_3	394–402
GLICKSBERG, IRVING. Measures orthogonal to algebras and sets of antisymmetry	105_3	415–435
GLIMM, JAMES. Locally compact transformation groups	101_1	124–138

	Vol.	Pages
GLUCK, HERMAN. The embedding of two spheres in the four-sphere	104_2	308–333
GOTTSCHALK, W. H. Substitution minimal sets	109_3	467–491
GRIFFITHS, P. A. On the differential geometry of homogeneous vector bundles	109_1	1–34
GROSS, LEONARD. Measurable functions on Hilbert space	105_3	372–390
GUNNING, R. C. Differential operators preserving relations of automorphy	108_2	326–352
GUTWIRTH, A. The action of an algebraic torus on the affine plane	105_3	407–414
HAGIS, PETER, JR. A problem on partitions with a prime modulus $p \geqq 3$	102_1	30–62
HAHN, F. and AUSLANDER, L. Real functions coming from flows on compact spaces and concepts of almost periodicity	106_3	415–426
HAJIAN, A. B. and KAKUTANI, SHIZUO. Weakly wandering sets and invariant measures	110_1	136–151
HALES, A. W. and JEWETT, R. I. Regularity and positional games	106_2	222–229
HALFIN, S. and ROBINSON, A. Local partial differential algebra	109_1	165–180
HALPERIN, ISRAEL. Reducible von Neumann geometries	107_2	347–359
HARADA, MANABU. Hereditary orders	107_2	273–290
HARRIS, BRUNO. Some calculations of homotopy groups of symmetric spaces	106_1	174–184
HARRIS, R. T. Weak eigenvectors and the functional calculus	109_3	367–384
HARRISON, D. K. Commutative algebras and cohomology	104_2	191–204
——— Abelian extensions of arbitrary fields	106_2	230–235
HARTMAN, PHILIP and OLECH, CZESLAW. On global asymptotic stability of solutions of differential equations	104_1	154–178
HARVEY, JOHN, HOLLAND, CHARLES and CONRAD, PAUL. The Hahn embedding theorem for abelian lattice-ordered groups	108_1	143–169
